Variables and Arrays

π

Variables

- Constant , Static
  - Integer , Double , Float
  - Boolean
  - Character , String → Text

- Define and Use

f1   f100

→ char @ = "Luqman";

int   age = $\boxed{25;}$

boolean = True/False.

double   b = 25.0045

Const int a = 100;

Arrays

Saving Multiple things into one variable (Same Data Type)

int   a =

int   b =

int   c =

2 4 5 ytes

2
3
4
5
.
10

int a [10] = [. . . . .]
              0 1 1 . . . 9

a [5] = 6
